Art Unit: 3744

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5, 8, 9, 11-14, and 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bishop et al in view of Pastryk et al '324. Bishop et al discloses the claimed invention except for the dispenser and ice chute. Pastryk et al '324 teaches an ice maker and container in which a dispenser is provided on the outer surface of the door and a chute is provided in the door to communicate the container with the dispenser. See especially Fig. 3. It would be obvious to provide the ice maker of Bishop et al with a dispenser and chute, in view of Pastryk et al, for the purpose of allowing ice to be dispensed without opening the door.

3. Claims 6, 7, and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
